("When the Biue and the Gray Sang Home, Sweet Home, Together" was written from an exclusil incident of the civil war. According to historical data, the opposing armies were camped, one on each side of the Rappshannock, the night before the battle of Fredericksturg. In the dreadful slangitor of the battle that began at dawn of the meat day, thousands of the poor fellows who folmed in that memorable chorus never again either saw or sung "Home, Sweet Home."

They were camped beside the river, Fifty thousand strong, or more, with the Rappahannock flowing "Twixt the armies on Burnside's Union Blues one one side Just across, Lee's men in gray, Waiting to begin the battle With the dawning of the day.

All along the lines of Blue, Till "Home, Sweet Home" from ev threat And every heart rang true.

Far across the Rappahannock
From the ranks of Southern Gray,
Came the eche of that home song,

Balfour and Home Rule.

Perhaps it is premature to assert that the American government will be instrumental in effecting a settlement of the present baffling Irish question within the British Empire. Question within the British Empire.
Putting it in that way, of course, makes it appear as if the United States was meddling sophomorically in an exclusively British domestic matter; nevertheless, of course, it is not that exactly.

In entering the world struggle to the Republicans.

Abdicated.

The Democratic leaders in the House of Representatives have abdicted. Responsibility for constructive action in the face of the gravest crisis in the nation's history passes, by consent of these leaders are quite inadequate. There is a shortage of labor and a shortage of material."

In entering the world struggle to vindicate the "rights of small nations," the American government might as well make it clear now that it is prepared "to go the whole hog." Entire frankness in the pourparlers with the British mission is required for their success. If it be true, as reported, that the President already has pointed out to Mr. Balfour the immediate effect on American sentiment that a grant of home rule to Ireland would have, we can only commend his courage and his frankness, the only criticism being, of course, that this matter might well have been late to the descredit to Congress and the tention not of Democrats alone but of the tention not of Democrats alone but of the country at large without regard to partisanship. It signifies the virtual, it momentary, collapse of a great party charged with the responsibility of government at a time when a firm handling of affairs is required for the national safety.

Kitchin, of North Carolina, titular leader of the House majority by virtue of the discreditify priority rule, has deserted his responsibility. He is an impediment to progress. His vision is about as broad as an imaginary line. Dent, of Alabama, priority rule head of the House Committee on Military a supendous preponderance of ocean craft. But the most eminent deserter of all is major problems of the war had been canvassed.

As a matter of fact there is no placating of American sentiment required for the allied cause. Mr. Balfour knows perhaps more fully than any British statesman the errors that England has made in its treatment of man and woman in America knows, that the obstitution of the Panama Canal energy, and even vigor intense, that we must now invoke. Now the game is one of ever-tightening pressure, shifting the point of immediate attack in a way to keep Hindenburg guessing. The operations around Arras clearly show that the British have properly re-enforced every point they have taken, for all the violent German counter attacks have been consistently repulsed. These counter-attacks are significant; not only have they drawn upon the Hindenburg reserves, but they unconsclously show the importance the Germans attach to the positions in the Douai plain that have been taken from them. Three days of these violent recoils have failed to produce a dent in the Haig line, and it is quite evident that the British pressure is

growing stronger instead of relaxing. We may safely postulate now that all plans of a Hindenburg offensive Sans together "Home, Sweet Home." on the western front, if any were made, have been thrown into the
